

A NEW EUROPEAN CASE OF THE REINCARNATION TYPE

by DIETER HASSLER

Update

On 8/17/2021, I inquired with Rolf's mother about how her son had fared in the meantime.

From the autopsy report it became known that Mario had suffered a kidney contusion. Rolf was born with a urine outflow obstruction that led to kidney congestion. He had to live with a catheter and doctors feared that he would have to go on dialysis for the rest of his life. Fortunately, things turned out differently. The kidneys recovered and Rolf has been healthy in this respect since he was 10 years old.

The autopsy report also shows that Mario was wearing a seat belt before the accident with his mother's car. From this, Mario's mother concludes that he had no suicidal intent. However, Mario was drunk.

Rolf's sexual orientation obviously does not follow the pattern from his previous life. He is interested in the female sex.

His physical vanity still exists.

Rolf is afraid of driving a car. When he drives with his mother, she has to drive very slowly, although he has no conscious memories of the accidental death in his previous life. He has not yet obtained a driver's license, but is considering perhaps doing so.

When Rolf was Mario's age at the time of his accidental death, he also had an accident. In January 2016, he was electrocuted on a power line on the Hamburg light rail system. The friend who accompanied him was able to detach him from the power rail, saving him from death. The two continued to run after that. When they were off the track bed, Rolf went down with heart failure. Passersby were able to revive him and made sure he was taken to the hospital. He was able to leave the hospital a few days later. This similarity of events in a previous life and the present life is known from regression cases. One speaks of "age synchronicity".

In the meantime Rolf also visited his mother from the former life. She declared to recognize him one hundred percent as her deceased son on the basis of many characteristics. However, Rolf did not recognize his former mother. She only seemed somehow familiar to him.
